

LDN TESTER CLEANING KIT

P/N WLC8338-000CK

DESCRIPTION:

The WLC-8338CK LDN Cleaning kit contains all of the necessary tools to clean and inspect adapters, connectors and jumpers. The VPS-106 visual power source is a high power laser source operating in the 670nm range. The high output provides an excellent tool for detecting optical faults such as:

- **Poor Splices**
- **Micro bending**
- **Defective connectors**
- **Loss of continuity**

The WLC-8338CK LDN Cleaning kit is an excellent package for technicians who need to maintain an LDN, and for those who need to locate faults that are in the blind launching area of an OTDR.

CONTENTS of the KIT:

1. Carrying Case - P/N WLC8338-001CK
2. Microscope - P/N WLC8338-002CK
3. ST Microscope Adapter P/N WLC8338-003CK
4. VPS-106 - P/N WLC8338-004CK
5. Kim Wipes - P/N WLC8338-005CK
6. Isopropyl Alcohol 16 OZ- P/N WLC8338-006CK
7. Foam Swabs Pkg. of 100 - P/N WLC8338-007CK
8. Can of Compressed Air 10 OZ - P/N WLC8338-008CK
9. Procedure Booklet - P/N WLC8338-009CK (In the cover under the foam)
